

QuietMod™

PORTABLE SOUND ENCLOSURE

THE PROBLEM:

Client required a sound enclosure to attenuate the noise created by a waste water treatment plant turbo fan housing.

THE PROJECT PARAMETERS:

OUR SCOPE OF WORK

Custom size: portable, IP rated, vented with high STC rating, operable doors and removable mullions.

QuietMod™

PORTABLE SOUND ENCLOSURE

THE NOISE BARRIERS SOLUTION:

Design and fabricated a steel framed, STC and weather resistant enclosure with separate compartments for mechanicals and telecommunication room.

THE RESULTS:

NB created a forklift movable structure with operating doors and ventilation.

THE BOTTOM LINE:

We utilize our core competency with the Mod Panel Line to fabricate custom enclosures to meet the needs of our client's vision.
