

## Noise Barriers Announces Launch of the QuietPivot® Pivot Lock Door Series

**Lake Forest, IL – September 30, 2021** – [Noise Barriers](#), a [Catalyst Acoustics Group](#) Company and leading brand of noise control products serving the industrial and architectural markets, is proud to introduce the [QuietPivot® Pivot Lock Door Series](#) to the market. Featuring a low-friction center pivot and double magnetic seal system, they are as easy to operate as they are effective at maintaining acoustical excellence in commercial facilities.

QuietPivot® Pivot Lock Doors are the perfect addition to theaters, performing art centers, modular recording studios and voiceover rooms, or any other high-traffic or sound-sensitive space. They are an effective alternative to partitions, offering more flexible space separation configurations for a unique, aesthetically pleasing and cost-effective solution.

High-traffic venues like museums and schools will particularly enjoy the benefits QuietPivot® doors provide. “Once installed, one or all door panels can be operational at a time, with the ability to keep them open in variable positions,” explained Noise Barriers Director John Finnegan. “In addition to improving acoustics, they also improve traffic flow and facility security.”

QuietPivot® Pivot Lock Doors are available in STC 45. The system arrives with acoustic seals, all hardware and even glazing factory assembled. “The result is a door that leaves the factory truly ready to install,” continued Finnegan.
