

**Lake Forest, IL – June 15<sup>th</sup>, 2021** – Noise Barriers, a leading brand of noise control products serving the industrial and architectural markets, is pleased to announce the release of the QuietSlide™ power sliding acoustical door in their lineup of noise control solutions.

The QuietSlide™ door system is offered as either single sliding or bi-parting configuration. This innovative door offers many unique and convenient features. All doors are custom fabricated

utilizing modular steel construction, and the assembly is factory operated prior to shipment. It comes crated for easy transport and installation, with the motor and belt system pre-assembled.

“Noise Barriers is eager to offer this durable and innovative door system to the noise control market”, said John Finnegan, Director of Noise Barriers. “Every detail was fine tuned for this power sliding door. Sound control, safety, quality and ease-of-use were top of mind in the design and development of every attribute.”

The Door assembly incorporates a design that will allow for the re-adjustment of the seal system by means of a 6-way adjustable design without the need to remove the door.
