Noise Barriers, LLC has developed and manufactures different door designs to meet specific site or project requirements including single leaf and double leaf personnel doors, and horizontal or vertical lift sliding doors. Special application doors include: bi-folding doors, pivot doors, doors within doors, and glass sliding doors.

QuietSwing™ Doors

Single leaf and double leaf personnel and equipment doors. We also provide large scene shop or studio doors, with a personnel door in the large leafs. Standard sizes from 3' x 7' to 16' x 18' . Larger sizes available upon request. STC 38 to STC 55

QuietSlide™ Horizontal Sliding Doors

Manually operated or motor operated sliding doors include unique six way adjustment to ensure high field performance. 1-1/2 hour fire rating is available.

QuietSlide™ Glass Doors

Select single units for many applications or tandem design for high performance applications. Offered in STC 30, 35, 46 and 53 ratings.

QuietSwing™ Pivot Doors

When operable partitions are not suitable and the design calls for flexible space separation, NBL pivot lock doors provide a unique and cost effective solution.

QuietLift™ Vertical Lift Doors

Manually operated or motor operated vertical lift doors include unique six way adjustment to ensure high field performance. 1-1/2 hour fire rating is available. Offered as single slab or telescoping design for areas with restricted headroom.

QuietLite™ Windows

Sound Control Windows are available single, double or triple glazed, vertical or sloped alignment, fixed or operable, wood or metal frame. Offered with option of laminated safety glass, tempered safety glass, bullet resistant, thermal, or firelite and fireglass glazing. Available with STC35 to STC 61 ratings. Unlimited wall thickness and size.

QuietSound™ Modular Studios

Modular Studios, Control Rooms, Voice Over Rooms, and Edit Suites are designed to eliminate costly delays and frustrating coordination of general trades often experienced with standard construction. Single source responsibility for design, supply and installation simplifies the construction process and saves time...design approval to completion is usually less than six weeks.

QuietSound™ Edit Suites

QuietMPR™ Music Practice Rooms

Lightweight yet extremely durable abuse resistant construction coupled with guaranteed acoustical performance make these modular rooms the smart choice for many applications. Rooms include floating floors, electrical and HVAC packages.
