Door Hardware - Security Locksets

The CDX-09 High Security Lock

The **X-09** was developed in conjunction with the US Government and meets FF-L-2740A, the US Government's highest security standard for container locks and doors. Approved by the GSA for use on Class 5 and Class 6 Filing Cabinets and Class 5 and Class 8 Security Vault Doors.

- Provides all the benefits of high-security electronic locking while maintaining the reliability of a mechanical lock, independent of batteries or outside power sources.
- Powered using Kaba Mas' PowerStar technology, an internal self-activating power plant that is activating by simply rotating the dial in either direction.
- Tamper-resistant and cannot be "hacked" because the digital audit information is hidden in the processor's non-volatile memory. The **X-09** is for a Safe or Filing Cabinet.

Features:

- **Power:** Internal, self-powered by PowerStar technology, which uses an internal generator that creates all necessary power. No batteries or external wiring required.
- **LCD:** Limited View Liquid Crystal Display with indicator arrows make dialing easy and exact.
- **Audit:** Records all openings and the record is non-resettable. Records unsuccessful attempts after 3 incorrect combination attempts and resets after a correct opening.
- **Door Prep:** Designed to fit industry standard mounting pattern.

Three Modes of Operation:

- | |
|--|
| 1. Single Combination Mode (1 million combinations) – allows access by dialing a six-digit combination. |
| 2. Dual Combination Mode (500 billion combinations) allows access only when two separate codes are entered within 40 seconds of one another. |
| 3. Supervisor / Subordinate Mode (2 million combinations) – allows access by a subordinate's code only after a supervisor's code has been entered. |

Noise Barriers, LLC. offers the following locks in order of least to most secure

The Simplex Lockset
The Trilogy Lockset
The LKM7000 (with and without the X-09)
CDX-09

National Stock Numbers (NSN):
