Re: Lead-Times: Doors and Hardware

The start of 2022 continues to provide instability on current purchased item lead-times, which are all extending, so we want to share some current information regarding NB's regularly purchased *Door Hardware*.

Under all of these evolving constraints, NB has been forced to modify most of our lead-times, extending delivery dates for many of our door projects, way more than we could have ever expected.

Please know we are doing what we can to expedite wherever we can to get your project delivered as soon as possible. The NB Team will do our best to monitor the situation and try to update you as often as we can with progress of your project.

Lead-times are stated on every quotation based on current information (per product), NB will update actual lead-items **at time of order and at time of release to manufacture**. Currently, Standard QuietSwing Doors have a 6-8 week lead-time from release to manufacture, and that would be with standard mortised lockset type hardware. Specialty and electrified hardware will extend this time significantly.

Below ([Page 2](#)) is just a brief insight into some of the extraordinary hardware lead-time items. Electrified locksets and those requiring any logic functions seem to be the most widely impacted. Use this for your knowledge to be aware of possible delivery issues when dealing with your potential customers

If you have any questions, please contact your NB Rep anytime you need exact and current updates. We value your business and partnership and will make every effort to mitigate these issues and work with you to navigate it together.

Commercial and Residential Hardware Products

Orders with quantities defined as a "Large Order" will require an updated lead time directly from Allegion.
Please refer to the "Large Order Quantity by Brand Series Reference Guide" to determine whether your order meets this criteria.

Brand	Shipping Location	Update?	Product Series	Published Lead Time (Weeks)	Exceptions
Schlage Commercial Locks	SAU		Locks: ND, S, S2	2	1. CS200 interconnect lock - add 4 weeks + 1 week if Masterkey is required AL Lock Obsolete effective 4/1/21, replaced by ALX Applies to Buy America Act Compliant ALX locks
